PURCHASING MANAGERS' INDEX (PMI) APRIL 2019 REPORT

1.0 Introduction

The April 2019 PMI survey was conducted by the Statistics Department of the Central Bank of Nigeria during the period April 9-13, 2019. The respondents were purchasing and supply executives of manufacturing and non-manufacturing organizations in all 36 states in Nigeria and the Federal Capital Territory (FCT). The Bank makes no representation regarding the individual companies, other than the information they have provided. The data contained herein further provides input for policy decisions.

1.1 Data and Method of Presentation

The *Manufacturing and Non-Manufacturing PMI Report* on businesses is based on survey responses, indicating the *changes* in the level of business activities in the *current month* compared with the *preceding month*. For each of the indicators measured, this report shows the diffusion index of the responses. The diffusion index is computed as the percentage of *responses with positive change plus half* of the percentage of those reporting *no change*, except for supplier delivery time, which is computed as the percentage of *responses with negative change plus half* of the percentage of those reporting *no change*. The composite PMI for the manufacturing sector is computed as the *weighted average* of five diffusion indices, namely: production level, level of new orders, suppliers' delivery time, employment level and raw materials inventory/work in progress, with assigned weights of *25%, 30%, 15%, 10%* and *20%*, respectively. The composite PMI for the non-manufacturing sector is computed from four diffusion indices, namely: business activity, level of new orders, employment level and raw materials inventory, with equal weights of *25% each*.

A composite PMI above 50 points indicates that the manufacturing/non-manufacturing economy is generally expanding, 50 points indicates no change and below 50 points indicates that it is generally contracting. The subsectors reporting growth are listed in the order of highest to lowest growth, while those reporting contraction are listed in the order of the highest to the lowest contraction.

2.0 Manufacturing PMI Report

Production level, new orders, employment level and inventories grew at a faster rate while supplier delivery time grew at a slower rate in April 2019

The *Manufacturing PMI* in the month of April stood at 57.7 index points, indicating expansion in the manufacturing sector for the twenty-fifth consecutive month (Fig. 2 and Table 1). The index grew at a faster rate when compared to the index in the previous month. Twelve of the 14 subsectors surveyed reported growth in the review month in the following order: electrical equipment; plastics & rubber products; cement; petroleum & coal products; transportation equipment; food, beverage & tobacco products; nonmetallic mineral products; chemical & pharmaceutical products; furniture & related products; textile, apparel, leather & footwear; printing & related support activities and fabricated metal products. The paper products and primary metal subsectors recorded decline in the review period.
